Problem-Solution Fit Report

Date	29-09-2026
Team ID	SWTID-2026-6274
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Problem-Solution Fit Canvas

This canvas maps out the target audience, pain points, behavioral triggers, available alternatives, and the ServiceNow Flow Designer automated solution to ensure precise alignment with organizational needs.

1. Customer Segment(s) [CS]	Employees, IT Procurement Officers, and Hardware Configuration Technicians.
2. Problems / Pains + Frequency [PR]	Delayed laptop provisioning, manual tracking oversights, and frequent bottlenecks in standard orders occurring daily.
3. Triggers to Act [TR]	New hire onboarding requests, hardware upgrade cycles, and standard laptop catalog submissions.
4. Emotions Before / After [EM]	Before: Frustrated, burdened by manual paperwork, anxious about delays.After: Satisfied, confident in swift automated fulfillment and transparent tracking.
5. Available Solutions & Pros / Cons [AS]	Manual email/spreadsheet tracking.- Pros: Low initial setup.- Cons: High error rate, lack of accountability, slow turnaround.
6. Customer Limitations [CL]	Limited budget visibility, device availability constraints, and reliance on manual approvals.
7. Behavior + Intensity [BE]	Manual task handoffs between departments resulting in high friction and significant

	productivity loss.
8. Channels of Behavior [CH]	Online ServiceNow Service Portal requests, offline verbal/email coordination.
9. Problem Root / Cause [RC]	Absence of automated workflow orchestration and task generation between service catalog requests and the hardware team.
10. Your Solution [SL]	Automating standard laptop procurement through ServiceNow Flow Designer to instantly generate and assign catalog tasks upon approval.
