Project Executable Files

Date	29-09-2026
Team ID	SWTID-2026-6274
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Project Executable Files Submission Guide

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	Executable binary / package (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
project-root/├── src/                    # Source code files (ServiceNow Flow & Catalog
components)├── tests/                  # Test cases and verification logs├── docs/
# Project documentation and architecture diagrams├── config/                  # ServiceNow update sets
```

```
and configuration files├── README.md                # Setup and execution instructions└──
requirements.txt          # System dependencies and integrations specification
```

Step 3: Deployment / Access Details

Hosted / Deployed URL (Demo)	https://dev-instance.service-now.com/standard-laptop-procurement
Platform Provider	ServiceNow Developer Platform (Utah / Washington Release)
Repository Link	https://github.com/SWTID-2026-2740/IT-Procurement-Flow-Designer
Login Credentials	Username: system.administrator | Role: admin / ITIL
Hosting / Environment	ServiceNow Cloud Enterprise Instance

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally / on ServiceNow:

Pre-requisites:- Active ServiceNow Developer Instance (Utah / Washington DC or later).- Administrative privileges (admin role) to configure Flow Designer and Service Catalog.Step 1: Log in to your ServiceNow instance (https://<instance>.service-now.com).Step 2: Navigate to Flow Designer via All > Process Automation > Flow Designer.Step 3: Import or verify the Flow named 'Standard Laptop task' with System User run rights.Step 4: Navigate to Maintain Items under Service Catalog and attach 'Standard Laptop task' to the 'Standard Laptop' catalog item.Step 5: Place a test order through Service Catalog > Hardware > Standard Laptop > Order Now.Step 6: Approve the request and verify automatic generation of Catalog Task (SCTASK) assigned to the Hardware group.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Email notification triggers depend on SMTP server configuration on personal developer instances.	Configured local email trap / System log verification; fully functional on enterprise instances. Status: Resolved.
