Project Title: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer	

Customer Journey Map Overview:Mapping out the employee/customer experience stage-by-stage when requesting a standard laptop through the automated ServiceNow procurement workflow.

Phase of Journey	Stage 1: Request Submission	Stage 2: Approval & Flow Automation	Stage 3: Hardware Configuration & Fulfillment
Actions	Employee logs into ServiceNow Service Catalog, browses standard laptops (e.g., Lenovo Carbon X1), and clicks 'Order Now'.	Manager receives approval request notification, reviews details, and clicks 'Approve'. Flow Designer automatically triggers and creates catalog task.	Hardware team receives assigned task ('Laptop need to Configured'), configures the device, and closes the task.
Touchpoint	ServiceNow Service Portal -> Hardware Catalog -> Item Form	ServiceNow Request Record -> Approvers Related List -> Flow Designer Trigger	ServiceNow Workspace -> Catalog Task (sctask) -> Fulfillment Queue
Customer Thought	'I need a reliable standard laptop for my work. The catalog is easy to access and submit.'	'I hope my manager approves this quickly so my order can move forward without delays.'	'My laptop request is approved and being configured by the hardware team. Great efficiency!'
Customer Feeling	Hopeful, Engaged, Satisfied with self-service interface	Impatient during wait, relieved upon automated approval	Delighted, Productive, Confident in IT department responsiveness
Process Ownership	Employee / Requester	Approver	IT Hardware

	& Service Catalog Admin	(Manager/Director) & ServiceNow Flow Designer Engine	Fulfillment Team & System Administrator
Opportunities	Provide clear technical specs, pricing, and estimated delivery dates upfront on the catalog item page.	Implement automated reminder notifications for pending approvals to further reduce wait times.	Add automated status tracking updates and SMS/email alerts upon successful configuration and dispatch.
